

Take home question 1 Rules (Hammarlund)

Length of answer, and due date:

1. Please be concise. Scientific writing should be to the point.
2. Submit your answer on September 21 at the lecture. We will try to correct these and hand them back within a week.

Ground rules:

The following rules are meant to make this assignment reflect the kind of challenges you will face in real life as a scientist:

1. You may discuss the assigned questions with each other or with anyone else. However, you must actually write the answer entirely yourself.
2. You will be evaluated on the clarity and precision of your writing as well as on the content of your answer.
3. Have fun.
